

BASSEY-UDO YOMABASI FORTUNE

Physical Oceanographer | Product Design Engineer

+234 802 249 8422 • marvieoma@gmail.com

[LinkedIn](#) • [Behance](#)

PROFESSIONAL SUMMARY

Versatile and detail-oriented professional combining a strong scientific foundation in physical oceanography with hands-on expertise in UI/UX design, graphics design, and content writing. Skilled at translating complex ideas — from oceanographic data to product concepts — into clear, engaging experiences and narratives. Experienced in field research, user-centered design, and multidisciplinary collaboration, and recently leverages AI-assisted development (vibe coding) to design and build functional digital products end-to-end, with a proven record of delivering high-quality work under tight deadlines.

CORE SKILLS

Design & Product: UI/UX Design, Wireframing, Prototyping, Visual Design, Color & Typography, Illustration, Graphics Design

AI & Development: AI-Assisted Development (Vibe Coding), Rapid Product Prototyping with AI Tools, Building & Shipping AI-Powered Products

Writing & Content: Content Writing, Technical Writing, SEO Writing, Editing & Proofreading, Press Releases, Social Media Management

Research & Analysis: Oceanographic Data Collection & Analysis, Field Research, Hydrodynamic Modelling, Scientific Research & Writing

Tools & Software: Figma, Canva, Microsoft Office Suite, Google Workspace, Slack

Soft Skills: Project Management, Leadership, Effective Communication, Critical Thinking, Teamwork, Time Management, Adaptability

PROFESSIONAL EXPERIENCE

UI/UX Design Intern — Dev and Design **Mar 2025 – Nov 2025**

- Assisted in designing user interfaces for web and mobile projects, using Figma to create wireframes, mockups, and interactive prototypes.
- Conducted basic user research and gathered feedback to improve usability and inform design decisions.
- Collaborated with designers and developers to ensure smooth handoff and accurate implementation of design components.

Corps Member — National Youth Service Corps (NYSC) **2024 – 2025**

- Actively engaged in community development and environmental initiatives, contributing to local sustainability practices and environmental awareness.

Social Media Manager / Graphics Designer — ABC Capital Limited **2024**

- Designed eye-catching graphics across all platforms, including websites, social media, and direct mail.
- Contributed to creative brainstorming for campaign activations, events, and marketing content.

Social Media Manager & Graphics Designer — She is Near **Jan 2023 – Dec 2024**

- Designed visual assets (social media graphics, banners, event flyers) to support community engagement and brand awareness.
- Collaborated with community managers to create content simplifying crypto concepts for beginners.
- Wrote, reviewed, and edited engaging content across advertising, websites, social media, email newsletters, brochures, and direct mail.
- Developed visually consistent brand templates for weekly updates, webinars, and announcements.

Content Writer — Icy Tales **Jan 2022 – Dec 2023**

- Created informative, engaging articles based on current trends and new products.
- Wrote SEO-friendly articles to improve search visibility and reader engagement.

Technical / Content Writer — TMLT Innovation Hub **Feb 2021 – Dec 2022**

- Published eight articles each month, wrote well-structured press releases, and developed media backgrounders.
- Worked under tight constraints and never missed a deadline; recognized as Staff of the Month.
- Partnered with marketing and graphic design teams to create social media content and compelling stories for online and print media.

Freelance Creative Writer / Editor — Independent **2018 – 2020**

- Delivered creative writing and editing services for online and print media clients.

RESEARCH & FIELD EXPERIENCE

Field Work & Research — Qua Iboe Estuary **2021**

- Conducted extensive research on estuarine hydrodynamics, analyzing tidal flows, salinity distribution, and sediment transport, contributing to a deeper understanding of estuarine processes and their environmental impact.

Project Research — Ibeno Beach, South Atlantic Coastline **2019 – 2021**

- Conducted an in-depth study of longshore currents, analyzing hydrodynamic patterns, sediment transport, and coastal processes.
- Applied field measurements, data analysis, and modelling techniques to assess current velocity, direction, and potential impacts on shoreline stability.

Industrial Training — Marina Resort, Calabar **2019**

- Gained hands-on experience with oceanographic instruments — water samplers, secchi disc, hydrometer, and refractometer — strengthening skills in the collection and analysis of physical oceanographic data.

EDUCATION

B.Sc. Physical Oceanography — University of Calabar, Nigeria **2017 – 2021**

AWARDS & LANGUAGES

Award: Staff of the Month — TMLT Innovation Hub

Languages: English (Fluent)
